# eaRECKON

HOW TO DOWNLOAD AND INSTALL A PLUG-IN

CREATE YOUR EARECKON USER ACCOUNT

Your **customer account** (used to purchase products from the online shop) and your **user account** (used to register and authorize your products) **are not linked** for more privacy and security.

Even if you already have a customer account, **a user account must be created** to download and authorize your products.

A customer account uses an email address as login while **a user account uses a 'user name'**.

If you do not have a 'user account' at www.eareckon.com, please create one from the main site.

A **confirmation email** will be sent to the provided email address in order to validate your account.

REGISTER YOUR SERIAL NUMBER

Once logged in, the 'LOGIN' button is replaced by the 'MY EARECKON' button.
Please click on this button to access all your registered products.

AUTHORIZATION KEY

<u>First</u>, put your SERIAL NUMBER here and press 'Enter'.
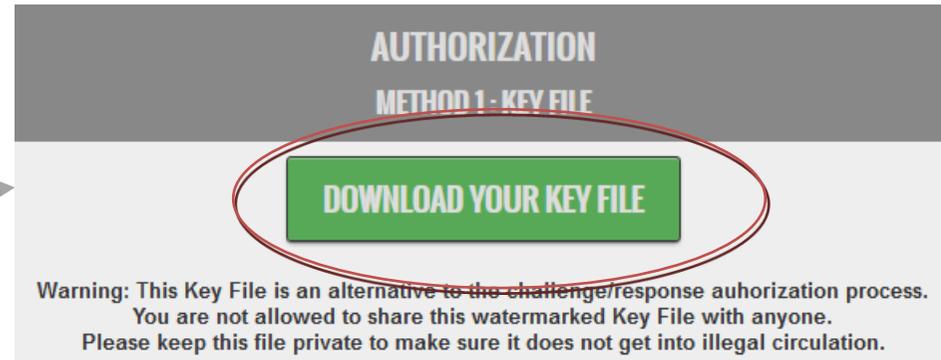

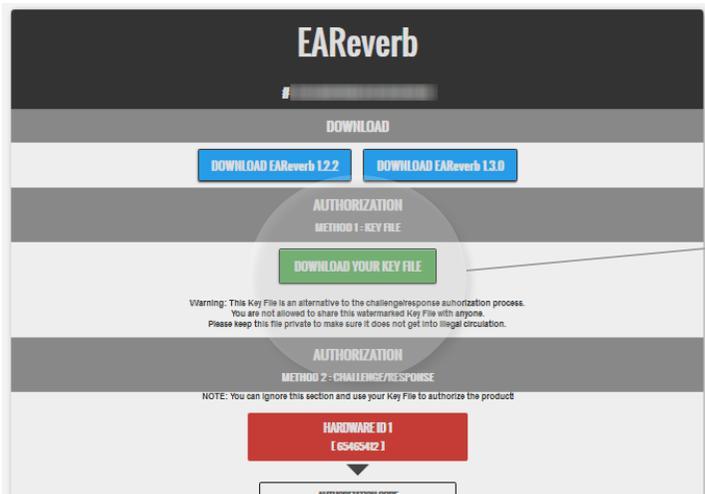

<u>Finally</u>, put your AUTHORIZATION CODE and press 'Enter'.

AUTHORIZE THE SOFTWARE (KEY FILE)

Once your serial number is registered in your eaReckon user account, and **as soon as your personal information can be (manually) checked by eaReckon**, a Key File will be available in your « MY EARECKON » page.

This authorization method is a faster and easier alternative to the Challenge/Response procedure.

Click on the '**LOAD KEY FILE'** button and select the previously downloaded key file.

By using the "key file" method, you do not have to enter anything in the plug-in (serial number, authorization code).
Therefore, you do not have to register any Hardware ID on the website.
